11/06/51 3 The propositions of Mr Trenchard, Mr Fountayne and Mr Crane touchinge reconciling the differences betweene Mr Henley and the Companie accordinge to an order of refference of the 11th day of June instant 1651

11/06/51 4 Mr Henley demands from the Companie £50 per acre for his 5th lott to bee paid presently for so much thereof as is adjudged dreynd and the residue upon the future adjudication

The Companie demands from Mr Henley upon his account (which is the thinge referred to us) £1831.05.09 as so much demanded upon his account which hee hath noe warrant for.

To reconcile their differences wee propownd that as touchinge 2500 acres belonginge to Mr Henley in the 5th lott, the Companie shall passe all theire interest in 1000 acres in Byall Fenne and 937 acres part of Woodwalton Comon and 100 acres of Higney grownds, (beinge now parcell of the twenty lotts), and Mr Henley to take them charged as they now stand for making good the 10000 acres formerly sold and if any part of these bee taken away or evicted, Mr Henley to have the landes which shall bee sett out by the Commissioners in lieu of what shall bee taken away, and to make up these parcells (beinge 2037 acres) 2500 acres. Mr Henley is to have 436 acres indifferently sett out of the 963 acres belonginge to the Companies part of Holme Fenne (but that part of the said fenne intended for a receptacle to bee noe part of the said 463 acres). And if any part of the said 463 acres bee taken away, hee is to have landes of equall value in lieu of what shall bee soe taken away or after the rate of 50s the acre at the declaration of the Company for the residence of the said Mr Henleys 5th lott above the said 2500 acres the Companie is to allow him after the rate of 50s the acre.

As touchinge the money upon accoumpt referred to us betweene Mr Henley and the Companie beinge £183.06.09, doe propound that as to £898 parte thereof consistinge of these 4 somes viz -

For passinge some actes of sewers £149.13.4

For passinge privie seales £403.06.08

Given his for his paynes £200.00.00

Arisen following the Acte of Parliament 1641 & 1642 £142.00.00

Total £898

That Mr Henley shall expecte his satisfaction for these things **[Page 64]** beinge before the Acte of Parliament out of the old arreres due before the Acte of Parliament and noe charge the Companie otherwise with the same.

And for £933.06.09 residue of the said £1831.06.09, if all other the thinges before mentioned bee agreed, we doe propound that the Companie would give allowance of the same.

viz:

following the Acte of Parliament - £450.00.00

following the business of 10,000 acres - £233.06.09

moneye laid out for the Adventurers - £150.00.00

for charges for passing of the Acte - £100.00.00

£ 933.06.09

- 13/06/51 4 Upon all which and upon a long debate touching the same and in order to a final determination of all differences touching the 5th lott as touching all other demands between Mr Henley and the Companie, it was thought fitt that Mr Trenchard should deliver the sense of the Companie to this effecte
- That they, taking up the whole proposition in writinge seriously into consideration, have agreed to the same and if Mr Henley will doe the like they will make an order therein accordingly
- Upon this, Mr Henley, beinge called in, desired that (out of the £898 in the paper propounded hee should expect out of the arreres) £699 thereof might be out of the first lott but hee did agree to their propositions with theis additional votes hereafter following which were part of the question and resolved
- That if Mr Henley be evicted by a signed tithe then hee is to have £50 an acre for so much as hee is evicted of the whole 2500 acres
- Whether Mr Henley shall bee satisfyed £898 out of the old debts and arreres before the Acte which is resolved here shall bee beinge also put to the question, whereupon Mr Henley beinge desired hath put his hand hereunto.

- 16/06/51 3 Whereas the Companie, takinge into their consideration their order made on Friday last touchinge their goinge downe into the Great Levell of the Fennes, do resolve and agree to goe downe this day fortnight unles some order in the **[Page 65]** meanetyme bee made by the Companie to the contrary and to meete at St Ives Wednesdaie next cominge fortnighte
- 16/06/51 4 Upon readinge the propositions presented to the Companie on Friday last, as also the two votes that passed thereupon without mentioninge any securitye for the signed tithe which the Companie thought not fitt to bee obliged in, in regard the security by the Acte of Parliament is sufficient, Mr Henley is contented to accept such assurance to bee made to the effect as is made for the 10000 acres and by way of exchange for his 2500 acres in lieu, onely this 2500 acres to stand charged accordinge to the propositions of Mr Trenchard, Mr Fountayne and Mr Crane.
- 16/06/51 5 A petition or remonstrance in writing of Sir David Watkins being read over to the Companie, it was thought fitt that Mr Gorges, Mr Castell and Mr Crane, or any two of them, bee desired to take the same into their consideration and forthwith, if possible, maybee to ende the differences betweene Mr Latch, Sir Henry Fenn and Sir David Watkins and Sir Thomas Hampson, or make some report to the Companie how they finde the same.

7 That they would consider if it would bee best for the service of the Companie to continue the banke from Crowland to Brotherhowse as it is now made or divert it wholly and repayre the bank from Crowland to Dowsedale and the view all the banks of Welland from Peakirke to Spaldinge.

[Page 90] 8 That there bee a course appointed that upon all occasions all the materials belonginge to the workes may bee preserved and as farre as can bee kept from spoile, and to consider if it bee not fitt to sell some parte of the materialls and give the Companie an account thereof

9 That they would consider how all the workes and bankes may bee preserved and kept from the spoile of cattell eyther by buildinge of howses or any other waies as they shall thinke fitt

----------	---	---

I am comanded by the Companie to lett you know that they are followed with daily complaints from severall members of the Companie that much of the levell adjudged dreyned is left undivided from the Country and in the meane tyme other parts of the said adjudged levell is not onely divided from the Country but also one lott divided from another, whereby some Adventurers are in present possession and make profit of their shares, whilst others are left altogether unprovided for in that perticular, which (if true) favors much partiallity and may occasion differences amongst them, which in prudence they thinke fitt by all meanes to endeavor to prevent and therefore as they, by former order appointed that all that part of the levell yet unsewered from the Country bee presently divided, so they have ordered and required wee hereby to signifie to you that it is the sense and order of the Companie [Page 115] that such part of each lott as is adjudged dreyned, bee presently as fully sewered and divided without partiallity or inequality as any other lott is already done, both from the Country and amongst themselves

The Companie have such sodaine news this morning importing their wellfare that they have forthwith, laying aside all their busines, dispatched this expresse to let you know that they have private advertisement that the expendor hath charged payment of £2400 to one Mr Bendish which they much wonder at in regard there is £3452.12.00 besides charges by bills already received and now to bee paid, and, by their letter of advice of the 18th of this instant, they did advertise you how the cash stood here, and they are very well satisfied that there is money enough in the Country for dispatch of their affaires and they have byn this 6 weekes in expectation to have an account of the cash in the Country and for above a fortnight called upon Mr Tench to certify them thereof but can gett none and doe consider that this vast some of money indeavoured to bee drawne from them are not with any respect to the Companie service but their great prejudice. Mr John Crane, some other Adventurer, havinge paid their conveyance in the Country besides vast somes from here, and the Companie are resolved to paie noe further moneyes untill, by the accounts out of the Country, they may bee ascertayned of the state of the cash there, and doe hope that this advertisement touching the £2400 is but a mistake and that the expendor would have more care of his credit and theirs then so hastily draw so great a charge from them, and therefore the Companie desire you that as soone as this comes to your handes, you would forthwith repayre to the expendor and in the name of the Companie signifie to him that hee charge noe more bills upon the Companie, nor expecte payment from the Companie untill by a clear account from him and his subexpendor it may appeare that there wants money for the service, and then hee will not so readily charge money as they shall cheerfully bee ready to paie the same. There is other busines of the Companie to bee imparted unto you but the hast of this dispatch prevents it and takinge leave I remayne

- 27/10/51 2 **[Page 123]** Mr Thurloe, beinge lately come out of the Great Levell of the Fennes, did make report to the Companie of severall miscarriages had happened in their affayres and the severall abuses done by officers imployed in the workes, in perticular by Burton, Burrowes and Shelton and some others who had lett out works at excessive rates and paid the takers not above 1/2 so much, and the division dreynes lett out at 14 pence and were undertaken at £08.10.12, and Burrowes had all the brookes in Ramsey lett to him at 16d a rod and they came but to 9d or 10d, and as to the mananging of Bedford River, it was agreed by all that it could not be worth above 3s 10d a rod. Mr Burton presently lett it out at £4 a rod.
- Remedy thought on at present was to stop their sallaryes but upon inquiry they found they had received their sallaryes before hand
- 27/10/51 3 Upon result of all this report, it was conceived (besides what will bee due for purchase of landes) that £17195 would complete the workes now in hande as well on the north and south side of Bedford River
- 27/10/51 4 Upon hearinge the said report, the Companie did retorne thanks to Mr Thurloe for his great paynes and care hee hath taken of their affayres
- 27/10/51 4 Memorand. That Mr Hawkins bee imployed in the oversight of the severall brookes between Bedford River and Neane and they will consider of a fitt sallary for his paynes
- 27/10/51 5 Ordered that Colonell Walton bee desired to give the Companie a meetinge tomorrow by three a clocke in the afternoon and my Lord St John is also desired to meete the Companie to treat about stopping up the dams at Crowland in regard it is a busines of great concernment to the whole levell.

- 28/10/51 2 A letter from Mr Hamond 26th October instant beinge read over by the Companie, it is ordered that a letter bee written and sent to him as followeth viz -

I am commanded by the Companie to lett you know that they did yesternight receive an account from Mr Thurloe of the state of their affayres which gave them great cause to thank him for his care and you, and Mr Walker for the like, and had so fayre a character of the dilligence and goode deportment of Mr Moore their surveyour that they desire to lett him know that the Companie will not bee unmyndfull of him upon any goode occasion to expresse their thanks, but they are not so much satisfied touchinge the cariage of some other of their officers, perticularly Mr Burton who by his clandestyne bargaines with his favorites, Rowland, Borrowes and Sherman hath so

much injured the Companie that notwithstandinge their service, the Companie hope to finde timely reliefe, but for **[Page 124]** the present, have resolved that noe contractes by him shall bee made good further than the stricte letter of their order whereby they doe not onely intend to take of your charge of back floores (the payment whereof they doe utterly disallow) but shall take all other lawfull advantages for their reliefe. They remayne also very much dissatisfied touching Mr Palmer who hath certified (as they are enformed) the good carriage of the under overseers to the expeditor as an inducement to procure their salary, and yet certified afterwards that they had fayled in their duty, not that the Companie doe hereby intend to approve any payment to the under overseers upon his certificate (for they desire you forthwith to acquaint Mr Tench that neyther in this perticular nor in any other, hee gives any allowance upon account but according to the stricte orders of the Companie) and to lett Mr Palmer bee sensible of his miscarriage in this as in some other of the Companie afayres. The Companie did understand by Mr Thurloe that all the overseers were discharged and that they had noe officers upon charge in the works but the expeditor, the chiefe overseer, the surveyor, the undersurveyour, the clarke comptroller and two clarkes of materials, besides Kelsey and Johnston which they very well approve, and have ratified the discharge by their order. And as for Kendall, who is to have oversight of the Crowlande banke, and Mr Turner upon some other parte, and some others whome they have in their thoughts for other places, they shall, as soone as conveniently may bee settled the same, and have already resolved that Hawkins should have the oversight of the brookes and bankes between Bedford River and Neane, to give timely notice to the chief officer in case of danger, and the Companie will consider of a fitt salary for his employment and have ordered that from the 20th October instante cominge away, the Companie bee not charged with **[Page 125]** any other salaryes without their spetiall order touching the bills of exchange of which they desired you to give present notice to all concerned herein and to lett them know that any payments made contrary to what they have hereby signified are not to bee allowed, so is their positive order. The Companie sent downe both shirts and other thinges for the Scots to Cambridge with a letter to Mr Crane of Cambridge and one enclosed to you, which hee hath certified the Companie that hee hath received and sent your letter away which they desire to have account of. They have ordered that the 40 and 30 foote dreyne called Vermuydens dreyne bee presently perfected and not to bee delayed at all in expectation of laying tonnells and suffered to run and are not yet satisfied of the necessity and conveniency of the intended dreynes, one from the first lott in Somersham by Westwater and under Vermuydens Eau, and the other from Wardike Loade to Ramsey Mere under the same Eau. And have it under debate touching the highwaye from Whittlesey to Upwood and March and from Somersham to Chatris, and therefore desire a stop of this till their further order. Touching the busines of the bills of exchange they can give no other order untill they have the state of the accounts, for as farre as they can yett perceive by what they have received from Mr Thurloe and comparinge the disbursments with their moneys by them returned, there must bee a considerable sum in the Country and no necessity to draw such vast sums from them. The Company are this day to speake to Colonell Walton about the busines of Crowland which next to the busines of money is of high concernement to the Companie, and as soone as anything is done about it you shall have notice. In the meantyme they desire your most careful eye to that busines at present to prevent imminent danger by the wet season and so **[Page 125]** bring a scandall upon the workes in generall. They desire also that you would have a vigilant eye upon the tonnells in the north bancke of Bedford River that they may bee certainly stopped before any flood or damage thereby come, the Companie, apprehendinge much danger to all the levell thereby which is already adjudged dreyned. They desire you to call upon Kelsey to send up presently a list of all the names of the Scottish Prisoners at the works as well sicke as others and to notify whether any be dead or run awaie, and how many, and once

every month without fayle to doe the like that the Companie may give account thereof to the Councill of State accordinge to theire order. They sent letters to Yorke to Mr Walker by the Satterday post and doe expect to have many more of the Scotts sodainly in the level and desire you to finde some fitt person amongst the Scotch prisoners fitt for a messenger to be imployed upon the Companie affayes as well here in London as to and from the Fennes. Before the messenger came awaie the Companie tooke into consideration the dam over Neane, a little above Ramsey Mere, and thinke fitt you forbear makinge that dam so long this winter till you see the experience of runninge the 30 and 30 foote dreyne, this beinge all I have at present in charge and I rest.

Your humble servant Robert Henley

28/10/51 3 The Companie, takinge into consideration the great necessity of makinge up the dams at Crowland and not having had as yet any treaty with Colonell Walton about the same, it is ordered that a letter bee forthwith written and sent unto him in the name of the Companie as followeth viz -

Yesterday and not before, the Companie tooke into consideration your certificate upon the Lord Comissioners order touching the navigation at Crowland (being the first opportunity of a full Companie) are very desirous to have wayted on you this daie to have given you satisfaction in some thinges mentioned in your certificate which they presume would have byn prevalent to induce you to believe contrary to what hath byn informed by the adverse partie, for they doe apprehend in some cleerness that no part of the River of Welland ever ran from Crowland to Guyhurne, or if it did, the old Southea was grownd up long before the late Earl of Bedford's undertakings, and all the navigation of late was only such as was over the whole fen when it was drowned and in drie somers none at all. And with all that, if any part of the Welland ran that way, then the Acte of Parliament did appoint that it was to run to Spalding and so the the sea to performe the outfall. But Sir, seeing the Companie finde it your sense to have two navigable sluces, one at Crowland and the other at Guyhurne and that you propounde it as a thinge of little charge to the Companie and no danger to the workes, they have therefore resolved that if you shall bee pleased to certifie the Lordes that the dams may bee stopt, they will in the springe, as soon as they can make a bottome, lay a navigable sluice at Crowland for the passage of a boate of two loade **[Page 126]** weight or thereabouts and a like at Guyhurne, so as they may not bee opened in tyme of a flood nor in the night. If you shall approve hereof, bee pleased to certifie your opinion to the Lords Comissioners by being present at their meeting tomorrow or else under your hand or to signifie to us what else you told fitt to bee done, for the Companie hath so great a confidence in your integrity and well wishes to the workes that they are desirous in all things to serve you amongst whome I shall expresse my self

Sir - your humble servant Robert Henley

29/10/51 2 The Companie received an answer this daie from Colonell Walton to their letter sent unto him yesterday touchinge the makinge up of the dams at Crowland as followeth

Upon consideration of your letter, I apprehend that if there bee a navigable sluice at Crowland of twelve foote wide and the like at Guyhurne, and layd before the first of June at furthest, and that it may so bee ordered by the Lords Comissioners, and that £100 may bee deposited at present in the handes of Richard Kendall of Crowland to provide materials and make the same readie in winter that the dams in Crowland bee made up, and I conceive it reasonable that there may bee care taken that there may bee noe passage through those sluices in tymes of floodes nor in the night for the inhabitants of Crowland and the parts adjacent have given me assurance, and are readie to engage that they will take care to preserve the said sluices from damage and make satisfaction for any damage that shall arise by them, which I hold fitt they should performe, and if cannot wayte upon the Lords at their sittinge you may acquainte the Lordships herewith

I am

Gent your humble servant Valentine Walton

Ordered that the dams at Crowland bee forthwith made up accordinge to the Lords Comissioners order this daie made, and that a hundred poundes bee forthwith deposited in the handes of Richard Kendall of Crowland accordinge to their Lordships order to provide materials and for the makinge two navigable sluices of 12 foote wide. And the Companie will give further order very sodainly who shall take care for providinge the materials and make the said sluices. And this order shall be a warrant to the committee of the treasury, the receivor and expendor or any of them to paie the said £100 accordingly

[Page 127] This order to be sent presently to Mr Hamond and to desire him to see the dams bee made up accordingly without delay and to appoint Richard Kendall or some other fitt person to doe the same

31/10/51	2	Ordered that any stranger who should come in to purchase defaulters lands shall, upon perfectinge his contracte, lay downe with the receivor 6d in the pound for his purchase moneye agreed upon, which is to bee forfeited to the Companie in case the bargain doth not proceed through his neglecte. And every Adventurer that shall purchase defaulters landes and not paie in his purchase money accordinge to the contracte, shall forfeite such a proportionable part of his owne Adventurers landes as shall bee agreed upon between him and the Companie at the tyme of makinge the said contracte. And the clarke upon every sale is to put the Companie in mynde that there may bee proportion agreed on upon every contracte by an Adventurer, and the six pence in the pound paid down by every stranger upon perfectinge his contracte.
03/11/51	1	Mr Henley Snr, Mr Latch, Mr Trenchard, Mr Thurloe, Mr Bradley, Mr Alex Jones, Mr Gorges, Mr Fountayne, Mr Alleyn, Mr Page, Mr North, Mr Andrew Henley, Mr William Crane, Mr Carill, Mr B Arthur, Mr Robert Hampson, Mr Browne
03/11/51	2	Upon readinge a letter from Mr Hamond of 30th October last, it is ordered that an answer bee sent by the messenger unto him as followeth on the behalfe of the Companie - The Companie have taken your letter into consideration and, first, for the business of the backe floore, the Companie doe understand that they are not obliged by any contracte with Mr Burton but that which is in writinge accordinge to their orders, and are informed that, by the contracte in writinge, the river was to bee made 111 foote wide, of that 75 foote to bee 6 foote deep, the residue too foote deepe and

the banckes to bee 60 foote in the seate and 12 foot high and twelve foote in the top and this at 4d the rod some, and other at higher rates, and this bargain in writinge is that only the Companie are obliged to. If Mr Burton hath made any other verball contracte, it is fit hee makes it good, and if the men they call takers have agreed with under workemen to make floores at any rates, it is very fitt those takers make first good their agreement with those under workemen with whome the Companie have nothinge to doe, and it would bee very unreasonable that the takers in former bargaines, where contractes have byn made at one rate and they put it out at ½ and some tymes at too thirds of the price and the Companie make good the first contracte with the takers, that now, in this case, the takers should put us to paie the under workemen and they put out money in their purses. Therefore the Companie doe desire that you onely treat with the takers according to the contracte in writinge pursuinge [Page 128] the Companie orders and yet give the under workemen the best assistance you can against the takers, letting the workmen know that the takers are the men who abuse them and make the Companie paie excesssive rates which those takers put in their purses, and in case of clamours or mutinye or feare of it the Companie desires you to gett assistance by some soldyers from Lyn, and if neede bee the Companie will procure some orders from here to quiet all their mutinies. Nevertheles the Companie is not so resolute in this point of back floores but that, if hereafter it shall appeare to them that the Companie have byn fayrely dealt with by the takers and Mr Burton, and that they finde that there is equity upon circumstances against the Companie, they will be ready to take the same into consideration and appoint some-one purposely to treat with the takers thereabouts, for the Companie have nothing to doe with the workmen in it, onely desire you to take care, as farre as you can in way of friendly assistance, that such money, as is paid by the Companie accordinge to the written contracte, may bee distributed among the under workemen who did the worke, and the Companie doe, believing if it were materiall that if it bee cast up what the banke comes to at two shillings the floore (and much worke was done at lesse), it will appeare that the money payable by the written contracte will be sufficient to paie for the bancke at the dimensions agreed upon and if there bee five foote abated in the seate of the bancke from the written contracte, then must the Companie have an abatement for the proportion from the price of the written contracte pro rata from the takers, but in no sort to have any thing to doe now with the workemen. For overseers, though the Companie bee informed that there were but 3 overseers for all Bedford River in the late Earle of Bedfords tyme and they were in hope that Mr Moore and his man and Mr Palmer would have byn sufficient, yet in regard you mention the finishinge the bancke and bottome of the new river within a month and the attendance at Vermuydens Eau and the dam at Salters Lode, the Companie doe give liberty to you to name overseers for a month not exceedinge five to continue for a month but not to put in any which the Companie have formerly disallowed, and they desire you would use your best husbandrie for the Companie in their sallaries and not give cause of exception to Kelsey who is a carpenter and an engineer and a diligent and ingenious man. For the materialls, the Companie understands there are two overseers of them already and they expecte they should looke after the imbezilling of them. The Companie are very sorry for the departure of the Scotts and might against their wills bee forced to extraordinary severity towards them. For the present, they desire you strictly to examyn Johnston the Provost Marshall and if you finde hee gave not present notice of their departure or hath byn negligent in pursuite and apprehension of them, wee shall proceede against him and you may lett the rest know that there is a stricte law persuinge their fellows, even death without mercy, to all that absent themselves without leave. For the busines of Lincolnshire, the Companie will take the same into their consideration. So not having else at present doe rest.

Your humble servant Robert Henley

And the Company notified you to desire Sir Cornelius Vermuyden to forbear anything further than in his part of direction of workes and information of the Company whether the workes been made according to direction for so is the Companies order. The Company have cause to feare that Mr Glossonne and Christian may gett too much money into their hands before there workes bee done, and it is noe small prejudice to the Company that the takers of workes get still before hand then the Company, and, if the workes bee insufficient, the Company are forced to an after game which they rather not mention at this tyme upon feares least the dam at Salters Lode should prove insufficient upon the experiment thereof this winter.</p>

| 08/11/51p.m | 2 | Ordered that the clarke write a letter to Colonell Francis Underwood as followeth

The Companie are advertised this daie by a letter to Mr Jessop from Mr Westhorpe, your agent, that hee hath drawne up £2400 upon him to bee paid by exchange after 3 days sight to Sir John Wollaston, wherein hee mentions that there would be great deale of money necessary against the next paie day whereas it appears by an account sent up to the Companie under the hand of Richard Clamp your agent, that you have received since the 23rd January 1650 the sum of £66881.17.06 and all the moneys issued upon the workes which the Companie can any way take notice of by the officers or comptroll booke to the 16th October 1651, amount but to £1958 so as all the payment to and at the last paie day amounte to but £53930.06.03 (in case they were to bee all allowed as well as issued) which comes short of the receipt. And therefore the Companie apprehend there should be a considerable sum of money |

eyther in your hands or in the handes of your sub-expenditor intrusted by you. And as to the bill itself, the Companie would desire you to informe yourself how it came to bee charged, for the bill is mentioned to beare the date 14th October under Richard Clamps hand and by his letter of the 13th October, the day before Richard Clamp advertised Mr Jessop that hee had appointed Mr Westhorpe to charge about £1000, but did (as it seems) give a blancke bill to Mr Westhorpe for the bill in Mr Westhorpes writinge and hee exceeded £1400 in the sum, and in regard the bill is come but this day and dated at Cambridge, the Companie feare that Mr Westhorpe have not dealt well with them, nor Mr Clamp used that care which befitted him to trust any one with blancke bills if exchange which might have ruined the Companie in their credit by fillinge up a blanke with more money than the Companie were in a condition to pay or usefull for the workes. But however the Companie have accepted the bill and have provided for payment thereof and desire that when there shall bee further occasions for money you would take care not to trust anyone with blank bills and for the present that your accounts may bee perfected and sent up that the Companie may know the true state of their cash in the Country. There is another thinge which I have charge to impart to you wherein the Companie and yourselfe are great sufferers and both without cause, and that is by clamour by filling the Country with clipt and light money paid to the workemen. The Companie comanded mee to assure you that they paie all good money here and they are confident that you doe the like [Page 134] in the Country for your part. And therefore they doe earnestly desire you to examyne and finde by what means that chipt and base money is paid to the workemen and to use some meanes for the repayringe both them and yourself therein and doinge right to those who hath byn injured thereby.

08/11/51p.m	3	Memorand. Mr Henley does give consent that Colonell Underwood, now present, may (if hee thinks fitt) contracte to the Companie for the 1000 acres of Sir Charles Harbord and Mr Stephens in the 16th lott.

for which hee is to pay £1700 within a weeke and is to bee allowed as parcell of that sum, £578, due to him by bill of exchange from the receivor of the Companie and for which hee is to give a receipt to the Companies receivor. And the residue of the £1700, beinge £1121, hee is to paie in the money within the tyme aforesaid. And hee is to hold the said land free of all taxes and arrere of taxes to this day. And the clarke is to draw a conveyance presently of the said 1000 acres to the said Colonell Underwood and his heires, or to such other person or persons, and to his and their heires and in such manner as hee shall directe.

I am comanded by the Companie to lett you know that they have long expected a state of their accounts, the not perfectinge thereof hitherto hath byn a great prejudice to them, and therefore to require you that you hasten them with all possible speede and send up what vouchers are produced to make good every

payment that so the Companie may be better able to judge what payments are made according to the orders of the Companie and to bee allowed and what not. This beinge all at present in charge I rest

| 19/11/51 | 2 | <p>Upon reading of a letter from Mr Hamond of the 17th instant, it is ordered that an answer bee sent unto him per expresse as followeth -</p> <p>The Companie received your letter of the 17th instant, and as to that part which concernes the new river and the question of backe floores, they commanded me to return you this answer that they are very sensible how much they have byn abused in that business by the originall contracte which Burton made for that worke in so much hast and when it seemes it was under water. It appeares that the takers, by the written contract, were to make that river and bancke at their full dimension for £4 a pole and there is noe mention of any allowance for backe floores or otherwise. They are satisfied how much they were over reacht, Burton using his owne judgement, or rather, act therein, refusing at the same tyme the advice and direction of those the Companie did then entrust for their affayres in the Country. And they cannot thinke themselves att all bound to make good any verball contractes or additions to contractes made by Burton or any other without their authority, which by your letter and the proofes mentioned appeares to bee the case of the backe floore. And therefore, as to them, they can say no more yet for so much of the river as is bottomed and there wants earth to make up the banks to the full proportion for the supply thereof backe floores will be brought in, and the takers have not byn mutinous, they are willing to referre the whole matter to persons chosen on both sides, whether the Company is to make any further allowance for the same, for the Companie desire not to bee their owne judges and where the bottome is not yet brought out they conceive noe demands of further allowance can bee made thereupon because it appears not what earth will yet bee required to make up the bancke, but when that is done without mutiny, the Companie will take that into consideration and doe what shall be reasonable. But for Newell whose christian name they desire to be sent up to make exemplary, [Page 141] and for the other mutinous persons the Companie is resolved not to bee forced to any satisfaction whatsoever by tumults and ryotts but instead thereof shall without delay endeavour to bringe the riotous to condign punishment, wherein the Companie would have taken present course if you had sent up the names of the rioters, which they desire you would doe by the next and to send up one or two make oath of the circumstances of the ryott</p> |
| 19/11/51 | 3 | The Companie desires you to lett Mr Towers, the high sherriffe, and Colonell Castell know that they hath received their letter and shall endeavour to fulfill their desire for the service of the Countrie, and shall give them a speedie account thereof |
| 19/11/51 | 4 | There is an order of Parliament made this daie that is death without mercy for any of the Scotts which run awaie and it is now printing, and it shall be sent you. By the superintendent, and the Company expecte that Kelsey and the provost marshall Johnston take care for retaking such as are or shall run away that justice may bee done |
| 19/11/51 | 5 | As to the last part of your letter, the Companie doe conceive that the bearer hereof Sanders Mackdell may bee a fitt messenger for them and they condescende to the dyinge of his cloth and the Companie doe leave it to your discretion to give him what you thinke fitt to defray his travellinge expenses |

- 19/11/51 6 Ordered that another letter bee sent to Mr Hamond which is to bee enclosed in the former as followeth - the Companie desire to know how much of the new Owse remaynes unbottomed and in what places and who the respective takers, and in case they doe not proceede to bottom it, to sett the Scotts or some other presently on worke to bottom it. They desire also to know whether the tonnells bee taken upon the north banke from Welshes dam downewards and that banke served. And again desire that they may heare somethinge from Mr Tench about the accounts and are very sensible for the delay used therein.
- 19/11/51 7 Ordered that a letter bee written to Mr John Turner of Eybery and Mr Henley is desired in the name of the Companie to sign the same as followeth viz -
- Mr Turner, the Companie hath a spetiall occasion to speake with the man that keepe the sasse at Stanground to give him some private directions to about keepinge the sluice and therefore they desire **[Page 142]** you to goe unto him and send him up forthwith hither. They will paie him for his paynes and charges. And because they would have the sasse safe in his absence they doe put it under your care and doe desire you to appoint an honest man to looke to it in the meantyme. They desire you to bee very carefull of it, the whole levell dependinge on it, and to trust no man with the sasse but one that you are sure of. You will directe him how hee shall come to the Companie and send him awaie with all possible speede immediately upon receipt of this letter by the way of Huntingdon. We know not the mans name and therefore desire you to put his name to this warrant which comes to you enclosed and there to deliver to him.
- 19/11/51 8 To Mr Turner of Eybury or on his absence to Mr Richard Kendall of Crowland
- The Companie have sent this bearer on purpose to directe the man hither and to come along with him.
- 19/11/51 9 Ordered than Mr Henley bee desired to send a warrant to the keeper of the sasse at Stanground and signe the same in the name of the Companie and send the same enclosed in the precedent letter in these words viz -
- The Companie hath occasion to speake with you about giving you some spetiall orders about keeping the sasse and therefore you are to come hither forthwith to their place of meetine about Temple Barr at Mr Henleyes howse and to doe it without delay. You shall be satisfied for your payments and travell. And the Companie hath desired Mr John Turner to looke to the sasse in your absence. Fayle not herewith by any meanes
- 19/11/51 10 Ordered that a letter be sent to forthwith expresse to Mr Moore and Mr Burton or eyther of them as followeth viz -
- Mr Moore and Mr Burton, the Companie comanded mee to signifie unto you that they did the 6th October last confirme an order made by Sir Cornelius Vermuyden for takinge away all stoppes in the River Neane between Whittlesey Mere and Pophams Eau whereof, as they are enformed, there is noe execution. They therefore doe againe strictly charge and order that you doe take speedy care that the same bee done accordinge to the said first order and, likewise, that Pophams Eau bee proceeded in effectually, the doeing of these two workes beinge of great moment to the Companie and without which most of the workes already done on the north side will bee fruitles to them. It **[Page 143]** is more than tyme that these workes are done and

therefore lett noe more tyme be lost.

| 19/11/51 | 11 | Ordered that Mr Jessop and the clarke of the Companie doe take into consideration and examyn what weight the iron chest is and agree with the iron monger at a certaine price for the same and what is fitt for the Companie to pay for it, and Mr Jessop is desired accordingly to pay the same takinge his receipt |
| 19/11/51 | 12 | Memorand. The Companie doe desire Mr Thurloe to conferre with Colonell Walton touchinge the makinge of a tonnell at Crowland and to see if hee does allow or disallow of the same and according make report to the Companie |

| 21/11/51 | 3 | Whereas Mr Charles, in the name of the soake of Peterborough, hath desired that a refference made by the Lord Comissioners at session of Peterburgh the 25th march last, might proceede according to an order then made by the consent of the soake and the Adventurers to Mr Norton and Mr Dowman, touching the unequall and unproportionable settinge out of the Adventurers parts of the landes, the Companie doe retorne this answer, that when the order was made it was presented that the comptroll was made by the whole soake, or at least the greater part of the soake, and was conceived that the whole soake should have byn bound to what should then have byn done by the said refferees, but the Companie have since understood that there were not above ten persons of the soake which were parties to the Companie and that the farre greater part of the soake desire that the landes may be as they are allready sett out, so, as the Company conceive, the proceedinge in the said reference will be alltogether finished, and therefore if all, or any of the soake, conceive themselves agrieved, if they shall apply themselves to the Lords Comissioners appointed by the Acte of Parliament, the Companie shall bee ready without delay to attend and make their defence and submitt to such order as the Lords Commissioners shall make therein. |

- 24/11/51 3 Whereas the companie, taking into consideration the cominge up to towne of Mr Moore their surveyor from the workes without their leave and finding the ill consequence that particular numbers of the Companie have advertisement of the state of their affayres in the Countrey and the Companie in generall wholly neglected, it is ordered that all their officers, imployed by them and that doe receive sallarys from them, doe hereafter apply themselves first to write letters to the Companie in generall touchinge their affayres before they write to any particular member of the Companie, and doe also order that neyther Mr Moore nor any other of their officers who have salaryes from them doe hereafter presume to take liberty to come away from the workes without leave first had and obteyned from five or more of the Companie, and it is further ordered that Mr Moore doe without delay retorne againe into the Great Levell of the Fennes upon the general service of the Companie
- 24/11/51 3 **[Page 145]** The Companie received your letter of the 22nd of this instant and are sorry to heare the mischance in blowing up the banke but more sorry to heare that the tunnills in the north bancke were not made according to their former direction. The Companie have ordered Mr Moore, who came away without their leave, to returne back forthwith and that none of their officers who receive sallary should absent themselves without leave from the Companie. And likewise, that all their officers and agents which receive sallary from the Companie should apply themselves from tyme to tyme to give advertisement of the Companie affayre in the first place to the Companie, and to directe their letters to John Hopkinson, their clarke, and desire you to acquainte all the officers and agents of the Companie herewith, and to that ende have comanded their enclosed order to bee sent you. They heare nothinge yet of taking up the dams and letting Vermuyden's Eau run and yet they heare that March river is brim full and if a sodaine flood come will endanger the north Levell and therefore desire your special and speedy care therein but the Companie doe not understand what you meane by opening Vermuyden's Eau for some tyme to see the experiment thereof.

The Companie heare that Henley's Eau doe not yet run and would willingly heare the reason thereof and likewise that reason of streitening the old Ouse at Erith which they apprehend must be the reason of the late breach. They recomende to your spetiall care the preservation of the sluice pitt by Salter's Loade and hope the bargaine with Christianne for settinge the sluices by the first of August will cause him to use double diligence, seeing his neglecte and default hath turned so much to the Companies prejudice and, above all, the care of the north level must not bee neglected and tendinge there to the cleare openninge of old Bedford river which the Companie understand hath byn damed up hardby the old sluice, which, if contynued, the Companie cannot understand how the riverletts and downfall of the northside of Bedford river shall be vented and, once againe, they command and to mynde you of serving the tunnills in the north banke and desire to have a speedy account what course is taken for ventinge the water which is come into the new Ouse

28/11/51	5	<p>In pursuance of the order of Wednesdaie last touchinge the nomination of fitt referees on the behalfe of the Companie upon petitions touchinge undue and unequall proportions of land sett out, the Companie thought fitt to nominate persons as followeth viz -</p> <p>John Mingay of Arminstall in County Northampton Esquire Francis Grey of Willingburgh in County Northampton Esquire Anthony Samuell of in County Northampton Esquire John Woodward of Bury in County in Committee Suffolk John Fletcher of Bury in County in Committee Suffolk John Baldwyn of in County</p>
01/12/51	1	Mr Henley Snr, Mr Latch, Mr North, Mr Nathaniall Powell, Mr Hampson, Mr Draper, Mr Buskin, Mr Thurloe, Earl of Bedford, Mr Culpeper, Mr William Crane
01/12/51	2	In persuance of a former order, Mr Jessop did enforme the Companie that there was above the some of £90000 expended for and towards the workes of the dreyninge and that thereupon Sir Cornelius Vermuden was to be contributory in proportion with the rest of the Adventurers whereupon it is ordered that Mr Jessop doe write a letter to Sir Cornelius to lett him know the Companie does expecte payment accordinge to the Articles of Agreement
01/12/51	3	Whereas in regards to the foote of the abstract of accounts lately sent up to the Companie that there is remayninge above £8000 in the hand of the expendor, it was money that the tax of 15d an acre, sett 10th November last, might bee respited which being taken into consideration after some debate touchinge the same it is thought fitt that the said debate touching respiting of the said tax bee resumed againe on Wednesday next. In the meantyme Mr Thurloe is desired to conferre with Mr Jessop touching the accoumpts and what further some of money is necessary to bee raised on Wednesday next, to report the same to the Companie and then to resolve when the said taxes to bee paid
01/12/51	4	[Page 149] Ordered that Mr Tench bee present at every pay hereafter to bee made, to the ende hee may see the same performed and thereby bee enabled to make perfecte entries of it in his bookes, and at those paies, nothinge is to be paid for but rod worke. Mr Hamond is likewise desired to bee present there if hee can, and as for all thinges else to bee paid, eyther for carpenters worke, landes, sallaries, or other thinges whatsoever, noe pay at all is to bee paid but by warrant from Mr Hamond entered into the comptroll and hereof the expendor is to take notice, the Companie declaringe that whatsoever money is paid contrary to this order, the same shall not bee allowed by the Companie. And Mr Tench is hereby ordered to send up to the Companie the next weeke a note of all the money paid since the 20th November last and to every paie hence forward to bee made, expressinge therewith for what such money is expended. And Mr Hamond, Mr Tench the expendor and his deputies are to have copies hereof sent unto them
01/12/51	5	Whereas the Companie is informed that the landes adjudged dreynd and whereunto the fower Trustees named in the Acte were put in actuall seizing and possession by the law at Peterburgh, are not onely cutt into turffe pitts but that the turffe there cut is ende above to bee carryed away to the great prejudice and damage to the Companie of Adventurers, the Companie therefore doe authorize Mr Jeffery Hawkins of Ramsey to seize and take into his possession all the turffe hee findes upon the said land and to sell the same at best rate for the advantage of the Companie and to service those that hee cannot sell upon the grownd, that they bee not carryed awaie. And hee is likewise to enquire out the names of such as cutt the same and send up

theire names to the Companie, and likewise to enquire the certaine tyme when the said were cutt, and in case any person or persons carry away any of the turffes, to have them before the Justice Phesant or some other justice of the peace.

- 01/12/51 6 Memorand. Ordered that Mr Browne, sollicitor to the Companie, doe forthwith take out a *latitat* in the upper bench in the name of the treasurer against Humfrey Rowland, William Sherman and Francis Burrowes for not performinge theire worke accordinge to contract, and the Companie leave it to Mr Hannon of Wisbech to nominate spetiall bayliffs.
- 01/12/51 7 The Companie received your [Mr Hammond] letter of the 28th November last, and since you have for the present deserted the dam, the Companie desire you to take care of servicing the tunnells on the north bancke that the north levell may be put out of danger. The Companie wrote formerly to you to bee informed how much of the new river wanted its bottom and having received nothings in answer, thereunto, they desire that by the next you would lett them know how much of the river is unbottomed and in what places. And now the workes are lessened on the south side, they desire that more haste may bee made of the north side and, in perticular, of the division dykes, Pophams Eau and the clearinge of Vermuydens 40 foote Eau, the runninge thereof they expected to have heard by your last. Concerninge the **[Page 150]** turffe pits, the Companie have made an order for Jeffery Hawkins which they desire you to send unto him, as likewise to send the other orders enclosed, to whome they doe concerne, and to give what rules you thinke fitt to enforce the execution of them. The Companie desires to heare some news touchinge the Scotts and how they doe behave themselves. They received a letter this daie from Mr Walker dated at Grantham 28 November last so that you will speedily heare they are come to Peterborough and if, in case there be found any Scotts that are taken running awaie, to secure them that justice may be done according to the resolves of Parliament
- 03/12/51 1 Earl of Bedford, Mr John Russell, Mr Edward Russell, Mr Gorges, Mr Henley Snr, Mr Trenchard, Mr Fountayne, Mr Thurloe, Mr Wingfield, Mr Parsons, Mr Browne, Mr Latch, Mr Alleyn, Colonell Underwood, Mr Draper, Mr Culpeper, Mr Hampson, Mr North, Mr Buffkin, Mr Gale, Mr John Arthur, Mr Nathaniall Powell
- 03/12/51 2 Ordered that a letter bee sent to Sir Cornelius Vermuyden in answer to his two letters received yesterday by Cambridge carryer as followeth viz - The Companie have received both your letters and thenceby the ill newes of a breach in the north bancke of Bedford river, and if the truth be as the Companie are informed that the bancke was a perfecte bancke in the place where it broake and that it happened neither by negligence nor willfullnes, which they hope you will strictly enquire into, they can say nothings to it at present more than desire that the place may be well served for the future, onely the Companie are much afraid that the makinge the 12 foote so nere it, on the south side thereof was a great reason of this breach and that it is very worthy to bee considered whether that dike will not keepe that banke all allong from Welches dam to Salters Lode under a perpetuall hazard and it is desired that you would take it into your consideration and give the Companie some satisfaction in it. And they differ from you in the opinion that if the new river had been bottomed this had byn prevented, but on the contrary that if all the water of Ouse had byn put between the bankes at this tyme this breach had byn fatall to us, that it would have drowned the whole North Levell. For that it is dangerous for men to meddle in busines that have not the whole fabricke of the busines in theire heades they agree with you in and feare they have had the experience of it too much already; for certainly if they that had the management of the workes on the south side, in the beginning of the last yeare, had considered all the circumstances, they conceive they had not byn engaged into so many inconveniences, nor the worke on the new river so

ill ordered that the lower ende thereof is yet to doe, which should have byn first done, and if the lower ende of that river had first byn begun and bottomed up as high as Welches dam and then cutt crosse into the old Bedford River, the floodes might have byn so ordered by letting some of the water run through the nyne holes that you might have wrought all the winter upon that part of the new river which is between Welches dam and Erith. For the addition of 20d a floore for makinge the bancke to its height upon pretence the bancke is sunke, you say ought not bee made upon the workemens account, the Companie understands **[Page 151]** not upon what terms this allowance is made. Mr Hamond writes nothing to us of it whose judgement is proper to bee had therein, beinge intrusted by the Companie perticularly in those rules. And therefore untill they receive somethinge from him, they desire no such allowance may bee made. The Companie hope to heare that by the next, the dam at Welnie is taken and that all is well again and they neede not desire you contribute your best assistance to it. For the paie daies Mr Hamond hath directions to order them so as they shall be appointed for the best advantages of the workes.

|----------|---|--|
| 03/12/51 | 3 | <p>Ordered that a letter bee written to Mr Hamond as followeth viz - the Companie received your letter of the last of November past and doe apprehende that the making of the 12 foote dreyne so nere the bancke on the south side was a great occasion of this breach and therefore they desire you to search that dreyne throughout whether it may not bee of dangerous consequence to the said bancke and satisfy the Companie therein. And whereas Sir Cornelius Vermuyden writes of allowing 20d a floore to the workmen, the Companie thinke it unreasonable and doe therefore desire your opinion in it before any order bee made in it. And they likewise desire you to consider of the pay days and take care to order them for they may be for the best advantage of the Companie and their workes. But the new bank beinge as it is overflowen on both sides, the Companie is concerned that noe great matter can bee layed out their upon for the present. The Companie doe hope that by this tyme the breach is taken and all things succceede well and doe relye upon yourselfe to have an eie to the serving all that part on the north side that the same may bee effectually done and that the Companie may bee fully assured thereof. I have sent you that part of Sir Cornelius letter which concernes the £20 a floore, here inclosed, which, when you have read, to seale and send it to him.</p> |
| 03/12/51 | 4 | <p>Whereas Mr Knivett on behalfe of the towne of Denver this day came to the Companie and desired satisfaction from them for diverse severalls of Denver cut through and prejudiced by makinge of Downham Eau which is cutt quite through their landes. The Companie takinge the same into consideration, and also the certificate made by William Fischer and Tristram Diamond Esquire upon the order of refference made at Wisbech doe hereby thinke fitt and order that Mr Hamond doe cause a surveyour on the behalfe of the Companie to ascertaine how much land as aforesaid is cutt through and damnified by makinge the said Eau and makinge the wan dykes thereunto belonginge to Denver, and beinge satisfied thereof to give warrant to the expeditor to paie the money due there upon, accordinge to their severall estates in fee simple £12.10.00 an acre for so much as is cutt away and to those that have lesser estates, pro rata accordinge to such estates. And Mr Hamond is desired to take care that the partes of the place, harmed herein, may, upon payment of the money make to the fower trustees conveyances of their landes accordinge to their representatives interests. And for the infants, to take you [Page 152] collateral security to convey when they come of age. And for the bridge, Mr Knivett moves the Companie to build on Downham Eau for the passage of the inhabitants of Denver into their landes lying on the west side of Downham Eau, the Companie will further consider thereof when they shall bee certified what the said shall cost.</p> |

03/12/51	5	A question beinge put whether or noe the day of sale of defaulters landes on Monday next shall be put of, it was resolved in the affirmative.
03/12/51	6	Another question beinge put what day shall bee appointed a day of sale, it was resolved that Monday come fortnight next shall bee a day of sale for all defaulters landes in payinge the last tax to all intents and purposes as it should have byn on Monday next. And Mr Thurloe is desired to conferr with Mr Jessop about the accounts, and to examyn and report to the Companie what money is in cash against Monday next.
03/12/51	7	Ordered that Mr Jessop doe forthwith pay unto Mr Fountayne or his assuigned the some of thyrty poundes which hath byn by Mr Walker taken up at Yorke for one Mr Berry for the use and service of the Companie upon Mr Fountaynes account
03/12/51	8	Mr Taylor this day delivered in a petition directed to the Commissioners and not to the Adventurers whereupon the Companie did not thinke fitt to have the said read out in regard of the like.
03/12/51	9	Ordered that a letter bee written to Mr Hamond with the order for the towne of Denver to bee sent enclosed to desire to see the same executed.
05/12/51	1	Mr Fountayne, Mr Andrew Henley, Mr Thurloe, Sit Edward Patherich, Mr Latch, Mr Hampson, Mr Gorges, Mr Alleyne
05/12/51	2	Whereas the Companie were informed this daie that one Richard Carter, that is a copie holder of the manor of Mepall, hath a certaine cottage or tenement that now by reason of the workes of dreyninge is layd in the Wash to his very great prejudice and damage. The Companie takinge the said into consideration doe thinke fitt and hereby order that Mr Hamond bee desired to examyn the prejudice and damage hee hath susteyned and forthwith to render unto him present satisfaction accordinge to what justice can bee required from the Company and to give warrant to the expendor for payment of money for that purpose.
05/12/51	3	Ordered this daie by the Companie of Adventures accordinge to and in pursuance of an order from the Lordes Commission made this daie that all officers employed under them on the workes doe forthwith forbear the diking out of any parte of the 175 acres in Sutton meadlandes untill the next sitting of the Lordes Commissioners in the Middle Temple Hall which is the next Wednesdaie after the next term, and it is espetially recommended to Mr Burton to see this order put in due execution.
05/12/51	4	Ordered that a letter bee sent to Mr Hamond as followeth viz -

[Page 153] There hath by Captain Cole and diverse of the inhabitants of the towne of Mepall, with the Companie, touchinge the landes in Sutton cutt through since the Acte of Parliament, they suggest and pretend that there is a 91 acre, 1 rod and 11 perches and say they are willinge to take satisfaction accordinge as you have agreed with them which they say is 20 nobles an acre. If this suggestion bee true, the Companie doe desire, according to their former orders and instructions, that the money may be forthwith paid to the owner of that land or else to give the Companie a very good reason why it is not, and they conceive you will bee satisfied in the measure of the land that the Companie may not pay for their owne lande. For the 175 acres which they alledge taken in the Meadlands which they conceive unequally sett out and which the townesmen doe offer to buy from the Companie, doe propound to those that are concerned in it that they will name one if they thinke fitt and the Companie to name another refferee to propound a way of accomodation, and in

pursuance of an order of the Lordes Commission made this day I have sent to you enclosed an order thereupon for the perfecte stopping of the diking out of that lande untill their Lordes next meeting in the Middle Temple Hall which is on Wednesdaie next after the next terme. And as to Bransill Close, belonging to Mr Collins and in farme to Goodmas Siffon, whereof complaintt is made of distroying the fenne, the Companie doe recommend the same unto your care to see them fenced where the Companie ought to doe it. And as to Richard Carters cottage in Mepall, I have sent you here enclosed an order of the Companie whereby you are authorised herewith to consider the damage hee hath susteyned and to give him present satisfaction. And as touchinge the landes alledged cutt (since the Acte of Parliament) in Mepall, the Companie are not satisfied for enlarging the price propounded by you formerly, yet doe desire to bee further informed from you touchinge the same if there bee cause. And lastly the Companie desire you to take into consideration Mr Michael Carters damage this last yeare of his 30 acres in Mepall, carryinge more feede of cattell, and who ought to make him satisfaction and what recompence the Companie ought in justice to make him, they desire may bee made accordingly. I am also to acquaint you with the order made this day which is that the order made at St Ives 3 July last, whereby you were desired to compound with the inhabitants of Sutton for lande cutt for the makinge of the Bedford River in the first undertaking, is forthwith discharged and made void to all intents and purposes

| 08/12/51 | 2 | Ordered that Mr Moore the surveyor shall have 4 Scotts prisoners allowed for to assiste him in rowing and carrying chayne and other imployment in order to the surveying of the Fennes and Mr Walker is [Page 154] to give direction that so many of the Scotch prisoners be drawne out for the service aforesaid. And when the said Mr Moore hath noe other imployment for them they are to returne to the other workes againe. |
| 08/12/51 | 3 | Memorand. The Companie doe agree that on Monday come fortnight next, so many of the members of the Companie as are willing may then, if they please, take into consideration the entertaynement of the Scotch prisoners for their private occasions |
| 08/12/51 | 4 | Whereas Major West and Captain Cole came and delivered in certaine demands to the Companie on the behalfe of Sutton Berystead, the Companie thought fitt to retorne there an answer as followeth viz - <ul style="list-style-type: none"> — The Companie takinge your demands into consideration, they conceive they have from the first to last given you an answer and made an agreement with you heretofor — For that which concerns breaking hegges by Scotts and dikers, they have nothinge to doe with it, the Law beinge open to them as well as others and the Companie will joyne with the Country to have any such misdemeanors punished — For all other thinges in your paper, the Companie doe referre it to their officers in the Country to bee informed from them of the perticulars and how farre the Companie ought to give satisfaction |

Ordered that this answer, together with a copie of the said demands, bee forthwith sent downe to Mr Hamond and the officers on the workes

08/12/51	4	Memorand: Captain Lane moved of the Companie for assurance of the landes in the 1st lott accordinge to agreement made at Peterburgh, and that Sir Cornelius had found out purchasers for the same and therefore that the conveyances may bee passed upon which the Companie had some debate, and Captain Lane being called in, it appeared that hee had not any authoritye in writinge for performinge the said agreement on the parte of the workemen, the Companie beinge willinge, as in them lyes to performe their part and convey the landes, if the other side will give the Companie securitye for payment of the money and performe what lyes on their parte.
10/12/51	1	Mr Henley Snr, Mr William Crane, Mr North, Mr Alleyn, Mr Trafford, Mr Latch, Mr Browne, Earl of Bedford, Sir Edward Partherich, Mr Gorges, Mr Fountayne, Mr John Russell, Mr Bradley
10/12/51	2	Ordered upon reading Mr Walkers letter that Mr Henley write unto him and in the name of the Companie retorne him thanks for his paynes and care taken of their affayres and to leave it to himselfe to take his owne convenient tyme to come up to towne upon his perticular occasions and retorne againe for the good of the Companie
10/12/51	3	[Page 155] Ordered that Mr Thurloe take into his consideration the money due to the Companie from that northside of Wisbech and use some means for the obteyninge thereof and certifie the Companie how hee findes the same and whether any parte thereof hath byn as yet paid.
10/12/51	4	The Companie takinge into consideration Mr Fyennes his business and the release sent up from the Lords viscoumpt, lay and seale which beinge read over, it is ordered that Mr Browne sollicitor to the Companie doe attend Mr Latch who is of councell for the Companie to know of him whether they may safely accept of the said release as it is now drawne, and hee is to attend him with the other writings in his custodie
10/12/51	5	Upon reading a letter from Mr Hamond it is ordered that an answer thereof bee sent unto him as followeth - Yours of the 8 Dec was this day, read onto the Companie, and as to that part as concerns the Scotts, the Companie doe intend, and this day have ordered, that they shall not be employed to hassakinge any perticular mans worke or any other private workes so long as there is any generall worke of the Companie to bee done. And if they are employed in hassacking any perticular mans grownde or other private worke, the Companie expects to bee answered for the same at the same rate as other labourers in the Country use to take for the like work. And the Companie to paie the Scotts, and the Companie desire that if you give waie to imploy them upon any private worke that you would take care that the Companie may be answered accordinge to this order. And the Companie doe leave it to your consideration whether it is not fitt for all the Scotts for the present to be first employed at Mepall. And whereas the Companie were informed that Sir Cornelius Vermuyden have given order for makinge severall sluces since the order of comptroll made the 14th November last, they desire you to certifie the truth thereof unto them and to lett Sir Cornelius Vermuyden know the Companie will not allow of anything done by him contrary to the last order of comptroll. And for answer to the letter received inclosed from the takers touching backfloores, the Companie are willinge that you appoint William Jessop gent for the person as to arbitration for the backfloores, to meete Mr Barber Edward Barber and the towne of Lynn to bee the place, but for the tyme and the perticular place in Lynne, it is referred

unto you singly to consider and appoint the same as you conceive fittest in refference to Mr Jessops other business that hee may make but one journey for that, and takinge the Companies accounts and to lett the Companie know the tyme that they may appoint Mr Jessop accordingly, and that the takers may not thinke they are delayed but, accordinge to theire former order, the Companie referre to arbitration, nothinge of backfloores but for such takers as have bottomed the river accordinge to theire contracte. As touchinge the dikes, the Companie will not admitt of altringe the proportion of 12 foote to 10 foote, and as to the rate they apprehend that what they have allready given is full enough and that a 1d a foote is the known rate for diking. Nevertheless if you finde there may bee any thinge in respecte of some thinge extraordinary in one perticular case more than another breede difference touchinge the same, they leave it unto yourselfe to accommodate who they know will take care not to bring a prejudice upon them by an ill president. Sir, the Companie are very solicitous and very much unsatisfied untill they heare that the breach at Wellnea **[Page 156]** is taken and all that north banke well serviced for they are very fearefull that unles some speedy course bee taken for the direction of the water of Ouse or giving it some larger passage there may happen some breach againe about Erith which may prove very prejudiciall to the north side of Bedford River.

| 19/01/52 | 2 | Upon readinge of a letter from Mr Jessop from Lynne touching the reference about the backe floores, it is ordered that answer bee sent unto him as followeth, together with instructions enclosed as also follows. |

Sir - the Companie heard your letter read over this day and they have inclosed, sent you some instructions touching the refference for backefloores which they have pickt out of their owne orders. And for any further instructions, they desire you to conferr with Mr Hamond who hath received severall letters from the Companie touchinge the same. And if you finde any further matters, to represent it to the Company before you conclude, however, they cannot but conceive themselves and all parties bound and lynyed up by the contracts

Instructions for Mr Jessop touchinge the refference to the back floores

1 - That noe entrance may bee made in the busines as touchinge any backe floores but where the takers had bottomed the river before the refference

[Page 168] 2 - That the Company orders may bee observed and that the Companie may not bee bound by any contractes but what was in writinge and made by such as had authority to make the same and entered with their officers, and that no additionall contracte must binde the Companie unles warranted by their orders. As this was not the consequence hereof is that the first contracte in writinge conteyned noe allowance for back floores but the takers, beinge obliged to make the river and bancke certaine dimensions and proportions, are to see it made good without this allowance

3 That the Companie must not by any meanes be involved to debate the busines with the workemen (with whome they made noe contractes) but with the takers, which takers are to satisfye the workemen according to their contractes with them and yet must make good their contracte with the Companie

4 That the price which the Companie was to paie by the originall contracte in writinge and must paie the takers is sufficient to make a river and banke of the proportions agreed thereby to bee made, but if not yet the takers must run the hazard of losse as well as gaine.

5 That the takers in severall other workes, eyther by craft or rather by collusion with Burton, have made bargaines of great advantage to themselves and losse to the Companie as in the 30 and 40 foote dreyne called Vermuydens Eau and other workes and if there should be equity against the Companie, where the takers have a hard bargain, then the like equitye should be for the Companie against all the takers who have taken worke from Burton at one rate and let it out againe presently at farre lesse rate and never done anythinge in it themselves but gotten some tyme five shliinges or ten shillinges a rod or more or lesse. And it were no amisse to examyn how much the under workemen have had upon the south bancke of Bedford River, for it is very probable that they have not had so much as the Companie have paid already, but the takers have taken the Companies money and sett the workemen to mutiny.

- 19/01/52 3 Upon report of Mr Fountayne made upon the order of refference to him and others of the Company, as also in pursuance of the order of the 11th of September 1650, it is ordered that Mr Latch shall have allowed and paid unto him by the receivor of the Company the sum of £100 in manner followinge, that is to say fiftie poundes in hand and fiftie poundes more out of the arreres of £600 after Mr Henley is satisfied.

As for Over and Sutton they are glad to heare you are in treaty with them and desire you to perfecte it. As to the runninge away of the Scotts, the Companie say they feare there hath not byn that care used in keepinge of them nor in pursuing after them when they are run away as should have byn, and for preventing theire running away for the future, they shall take what care they can here about by obteyninge further orders from the Parliament and Councill. In the meanetyme, they thinke the best way to make them all engage one to another as you propose, but they thinke it not fitt to remove them from the hard worke but to encrease their wages the more to encourage them to goe on. The Companie as to Johnson had thought to have move the Generall to have him tryed at a Court of Warre for his life but seeing the course of robust justice hath taken place, they will forbear the course, yet the busines beinge of so great weight they have not resolved what further course to hath concerninge him. | 26/06/52 | 4 | The Companie tooke into consideration a paper delivered in by Mr Latch, beinge perticular thinges yet to be done on the north side of Bedford River, which was this daie read over. |
| 26/06/52 | 5 | A question was put and resolved that the order and instructions for Mr Hamond to undertake the perfectinge the south side of Bedford River for £2500 bee vacated in regard hee does not accept thereof. |
| 26/06/52 | 6 | The Companie doe resolve and hereby order that with the same money allready issued for doinge the workes on the south side of Bedford River, there bee so much more issued for the perfectinge thereof to fitt it for an adjudication accordinge to the Acte of Parliament, so as it exceede not £2500, and no contracts to bee made exceeding that some, and care in the first place is to bee taken for preservation of Cambridge navigation. |

| 26/06/52 | 9 | Upon readinge a letter form Mr Hamond it is ordered that an answer bee sent unto him as followeth viz - |

The Companie were very hardly drawne from their former resolution in perfectinge all the north side before they proceeded in the south side haveinge found (by deare bought experience) the prejudice of havinge too many workes in hand at one time, yet beinge advertised by your letter of the 10th of this instant that £2500 (if tymely disbursed before harvestt) would dreyne the south levell did yeild to put much money in your handes so as, upon second thoughts you were satisfyed that the dreyninge would bee perfected with that sum, but with expresse resolution not to disburse any more than that sum upon any presence whatsoever, and were not a little sensible of the breach of their orders and instructions in attempting anything on the south side (save in order the preserve navigation) before the north side fully perfected, though then permitted, [Page 232] and now, upon readinge yours of the 22nd instant, they finde that there is a great mistake, for if the dreyninge may not bee perfected on the south side with that money to obteyne an adjudication, the Company neither by their last order did, nor yet doe intend, to lay out any money on the south side, but accordinge to their instructions for preservinge the navigation, untill the north side finished, and if any contracts have byn made or moneys issued not agreeinge to those instructions and orders of the Companie, they will not allow it, and they cannot apprehend that it will be accompted a good dreyninge to imbancke the rivers and leave the levell to bee drowned by the downfall. The Companie doe not thinke themselves yet justified or repayred for the injury done to them or affront to their agents in havinge their money deteyned in the expendors hande or his subexpendors hande and then clamouring on the Companie and affrontinge their instraments. They are sufficiently satisfyed on the miscarriage of Kethermister and therefore without more question they doe require that forthwith, upon receipt hereof, if hee not bee discharged, you discharge him, and then no sallary bee allowed him from the tyme that this comes to your handes and lett him bee called to account

for what moneyes hee hath had for the Companie and whatever hee hath byn trusted in on behalfe of the Companie. The Companie desire to know by what warrant Mildenhall, Stoake and Brandon rivers were let out to bee done and you are desired to send up the copies of severall contracts and how farre the workes are proceeded in. I have accordinge to the comand of the Companie sent you here enclosed a copie of a letter sent unto them from Lieutenant Generall Fleetwood beinge sent unto him from his agent in the Country, the perticulars whereof they desire you would carefully examyn, the Companie beinge very sensible of any such miscarriages as therein is alledged, and therefore if any such bee, they desire they may bee certified and that if the workes proceede they will order perticular wayes and passages to bee speedily made, as also satisfaction for growndes cut through, and in all others that they may bee done with as much ease to the Country as possible may bee.

- 16/07/52 2 Touchinge the devision of the severalls by Mr Moore, the Companie upon any instant complaintt unto them of any undue and unequall settinge out thereof will be ready to give the Complayntt all instant and reasonable satisfaction therein
- 16/07/52 3 The Companie for many reasons offered this daie against the demandinge adjudication on the south side of Bedford River and upon readinge letters from Sir Cornelius Vermuyden and Mr Hamond doe hereby order that letters bee written to them as followeth viz -
- The Companie have received yours of the 1st July instant whereby you offer severall reasons for demandinge adjudication of the south side this summer, all which, as well as what Mr Hamond and others have offered, have byn taken into consideration and byn debated two severall daies [Page 244] and there upon the Companie came at last to this resolution to deferre the askinge of judgement at this tyme. It will be too longe to acquainte you with the severall reasons and arguments that weighed with the Companie upon this debate. A comitted experience was thought by all to bee necessary as well to satisfie the Comissioners, as those that are to parte with their land, which was had as to the other levell and severall crops then upon the grownd preserved by the Companies workes speake for them, besides many judgements then done and in hand, and yet you know how difficult a worke it was to procure that judgement. The Companie have none of these arguments to produce in this case, nay the 4 rivers which yourselfe hold necessary to bee done in order to the demande as aforesaid are not yet finished and it is possible that by unseasonblenes of weather or some other accident they may not bee perfected with that tyme now thought of and then there would bee little left the Companie to make good their demand of judgement and you can easily judge how inconvenient and dangerous it would bee for the Companie to carry Comissioners downe into the Country and have them retorne againe without doing what they came for. This, and severall other thinges not so fitt to bee put in paper satisfyed the Company in comminge to the resolution aforesaid, espetially not apprehendinge any great inconvenience that will fall out on the other hand more then the losse of the winters profitt which is not at all considerable. However, the Companie cannot but very well interprett your endeavours to promote and hasten the bringinge to perfection this worke, wherein they are so much concerned in pointe of honour and interest. The £2500 designed for the south side will bee provided and duly paid. The rest of the money is to bee applyed to the north side untill the workes formerly diverted to be done bee finished, the security and improvement whereof, as it concernes the Companie most in point of profitt, so it will of itselfe answer all arguments that can bee brought against the Company on the other side. The Companie therefore desire you to give your direction and assistance for the speedy dispatch thereof.
- 16/07/52 4 Ordered that a letter bee written to the expeditor and that hee take notice that the Companie, havinge appointed £2500 to bee layd out on the south side of Bedford River, hee is not to issue out any more in that side, save onely the said sum of £2500, at his owne perill.
- 16/07/52 5 Severall arguments were urged for makinge a cutt through Marshland viz - that by reason of the insufficiency of Well Creeke to carry downe the water of that dreyn, the danger may happen to bee great to quantyities of coleseede already sowne or to bee sowne and the sinkinge of the north levell.
- 16/07/52 6 Ordered that Mr Claythorne bee desired to joyne with Mr Gregory Gawsell, Mr Latch, Mr Castell and Mr Drewry, and they or any two of them, shall have power to meete together and put in execution that severall orders formerly made for workes yet to bee done on the north side of Bedford River.

17/07/52	1	Mr Fountayne, Mr Trenchard, Mr William Weston, Mr Crane, Mr Henley, Mr Thurloe
17/07/52	2	[Page 245] The Company resuming the argument yesterday in regard for makinge a cutt through Marshland, that is to say the insufficiency of Well Creeke to carry downe the great quantities of coleseede already sowne or to bee sowne and the sinkinge of the north levell, doe hereby order a letter to Sir Cornelius Vermuyden to desire him forthwith to goe upon the place and advise in what place and manner the same is fittest to bee done, and an estimate or the charge and give them a present account thereof to the ende that, if hee doe not satisfie the Companie to the reasons offered, that they may speedily proceede to have it done this summer.
17/07/52	3	It was moved that the 282 acres in Beeflinges Fen in Doddington might bee sett out for the 6th and 7th lott accordinge to order of the Commissioners yesterday made, whereupon it is ordered that a 12 foote dike bee made to devide the said land from the Country at the Companies charge and Mr Moore the surveyour is to see the same done accordingly forthwith.

19/07/52	2	Ordered that the expeditor by himselfe or Mr Clamp bee at liberty to draw bills of exchange for any sum or sums of money not exceedinge the sum of a thousand poundes, the former order of restraint notwithstandinge
19/07/52	3	Whereas by the 1st instructions to Lieutenant Colonell Francis Underwood, expeditor, hee was monthly to deliver a perticular account under his hand to the persons authorized thereunto, all perticular sumes by him received and issued, ordered that hee doe forthwith, after the cominge hereof, to his handes prepare a perticular distincte and orderly account of all moneyes by him received and paid from the 28th of Aprill last to the 20th of this instant July, expressinge the tyme upon the person, to whome and the service for which the severall sums bee received and issued and the some delivered under his hand by the last of this month to Mr Latch and Drewry and Mr Tench beinge the persons here authorised to receive the some, or to any one of them. And that for the future hee doe on the 20th of each month deliver to the said persons, or to any one of them, the like account of all moneyes by him sent and paid in the preceedinge month and this course to contynue till the Companie shall in that behalfe give other order
19/07/52	4	Ordered that Mr Latch, Mr Drewry and Mr Tench or any one of them doe receive from the expeditor and under his hand the accounts ordered to bee delivered to them by an order of this day. | 14/08/52 | 2 | Workes on north side of Bedford River

1 The Companie tooke into consideration in the first place what is fitt to bee done yet on the north side of Bedford River and in order there unto, read over the instructions |

of the 2nd August last. It is declared that the directions for the deviation dreyne was intended onely the 16 foote dreyne on the one side and the 12 foote dreyne on the other and Sir Cornelius Vermuyden and the surveyour doe both declare the thinge is put out and in a manner finished. But it beinge enformed that there the under overseer, havinge had this perticularly in his charge and the same not done, it is ordered that unless hee attend the Company before they retorne to London, Mr Hamond bee desired to examyn the same and if hee findes upon exaymination there hath beyn any neglecte in this to stop his sallary untill it bee done or else turn him out of his place forthwith, and is if further ordered that Mr Hamond bee desired to have an account from Ewer to know what is the reason that Pophams Eau dreyne hath layne so long in his hand and not yet done and to imploy Ringwood to have it speedily dispatched.

2 That Mr Moore the surveyour beinge now present does affirme that the highway from Whittlesey to Upwood Hards is lett out and in doinge but the Companie doe order a tonnell to bee layd on Bevills Leame where the highway crosses it that the passage of the water bee not stopt.

3 Touchinge a highway from Bevills Leame up to Ramsey, in regard the Companie doe finde that the highway from Whittlesey to Upwood beinge but halfe a myle about may serve for the present, doe desire 5 or more of the members of comptroll to give order eyther for goinge on therewith or the stop thereof as they shall thinke fitt.

4 That care bee taken that a suficient tonnell of 4 foote wide and two foote high bee layd upon the highway from Somersham to Chartris where the highway crosses the West Water and that the towne of Somersham and Chartris bee mynded by Mr Drewry for to gravell the same before winter, accordinge to theire agreement, and to wayt upon Mr Sergeannt Barnard to desire him that by some order of sessions, they may bee required to see the same performed, otherwise the Companie must proceede with an effectual prosecution of the indictment against the townes to have the old way sufficently made, and that any mans severall growndes that shall bee cut through in layinge the said tonnells and makinge the highway the superintendents are to take care to see satisfaction given them accordinge to the Acte of Parlimant and to take assurance from them.

[Page 258] 5 For the stops under March bridge and in March towne, in regard Sir Cornelius Vermuyden does affirme that the passage is sufficient already upon his view and that it will begett a great deale of unnecessary charge to the Companie, they desire 5 or more of the members of comptroll to deliver their opinions whether they thinke fitt to enjoyne the doinge of it or no.

6 Sir Cornelius Vermuyden affirms that that place of the northe bancke of Bedford River between Erith and Mepall is very little deficient but the Scotts are in hand repairinge of it, and other part thereof between Salters Loade and Welney Pinchbacke hath taken care thereof and it is in hand and doinge, and that that part thereof betweene both is sufficient, but as for any matter of foreland it can bee noe longer then it is from Erith the Welches dam on eyther side of the bancke unles Bedford River bee filled up which is not fitt to bee done.

7 Touchinge a new dike from Welches dam downwards the Companie upon view will determyn what to doe therein

8 Touching the sluice to bee sett downe at Guyhurne for plant water, in regard Sir Cornelius Vermuyden affirms it will be dangerous to the whole levell to set a sluice there, beinge soft and moorish grownd and a great weight of water will bee

constantly against it in tyme of floodes, and that the out toe will serve for small boates which is as much as that water will carry, and the Companie desire 5 or more of the comptroll to take into consideration whether it bee fitt to enjoyne the settinge downe of a sluice or not. Concerning the stoppes in dreynes, Mr Hamond does affirme there is care taken therein as much as may bee but hee conceives that as well the Company of Adventurers as others ought to make dams over theire dreynes to save charge of bridges, it is therefore ordered that Mr Hamond doe cause some trustee persons to goe over the growndes and remove all such stoppes in dreynes before the floode comes, and if they finde them done by any Adventurers or his tennants to give notice that they remove them at theire owne charge and if they doe not, every Adventurer is to pay the charge of such removall, and the persons employed are to certifie the comptroller what the charge is that concerneth every perticular Adventurer.

9 Touchinge Car dike, Sir Cornelius Vermuyden does certifie it is made serviceable and nothinge more is fitt to bee done to it.

10 Touchinge Elme Leame, the members whome it was formerly recomended are desired to treat with the towne of Wisbech touchinge the same and send up an estimate of the charge.

11 Touching Waldersea bancke the Companie are resolved to take a view hereof upon the place and doe desire Sir Cornelius Vermuyden, Mr Hamond, Mr Drewry and Mr Burton to examyn why it hath byn neglected all this while, they conceiving there hath byn herein a great default.

12 Touchinge the scowringe out the Munckes Loade, it was enformed Humfrey Rowland did undertake it but not doinge it sufficiently some part of his money was stopt but hee hath since agreed to doe and finish it.

14/08/52	3	[Page 259] Touching the deepening of Clowes Crosse dreyne, accordinge to order of the 1st July last, Sir Cornelius Vermuyden, Mr Hamond and Mr Drewry doe affirme that upon view it is deepened sufficiently to carry away the water of that levell and needeth not any more to bee deepened with which the Companie doe rest satisfied and take it to bee a full performance of the order.

14/08/52 p.m	3	Ordered that over Vermuydens Eau, the 30 and 40 foote dreyne bee made two horse bridges in the Comon Drane way att Puttockes drane and it leading to Copholder Bancke which are estimated by Sir Cornelius Vermuyden to amounte to 10 or 12 poundes
14/08/52 p.m	4	The Companie tooke into consideration two navigable sluices that are to bee sett at Croyland and Guyhurne, whereupon it is ordered that Sir Cornelius Vermuyden, Sir Edward Partherich and Mr Hamond bee desired to attend Colonell Walton and give

him satisfaction why the same cannot bee done or otherwise to give satisfaction to the Commissioners att theire next meetinge.

- 14/08/52 p.m 6 The Companie entered into debate touchinge the effectuall progress of the workes on the south side of Bedford River as well as the north side.
- 14/08/52 p.m 7 A question was put and resolved that the workes on the south side of Bedford Riiver shall effectually bee proceeded in, yet not to interrupt or hinder the perfectinge of the workes on the north side of the Bedford river.

The Companie havinge taken into consideration the severall perticulars propounded and designed by Sir Cornelius Vermuyden for carryinge away the downfall from the south levell and an estimate of the charge and also the perticular workes to bee done upon the north levell and the estimate of the charge and the state of their money in the expnditors handes and the receivers, and what remaynes upon arreres and beinge this day mynded by Sir Cornelius Vermuyden to proceede speedily with the workes for carryinge away the downfall of the said south levell this season of the yeare, beyond the expence of £2500, which was formerly ordered of the Companie, designed for imbankinge the rivers on the south levell untill the workes on the north side were finished, and upon full consideration of all perticulars in regard of the undertaking by the Acte of Parliament does enjoyne a proceedinge in the dreyninge the whole levell without cessation or intermission and that the north levell is already adjudged dreyned and the workes to bee done for repayres there are in hand and will not bee retarded by any workes on the south side but bee speedily finished and that the Companie since their first resolution not to exceede the expence of £2500 in the south levell this yeare have layd a tax of 15d an acre for dreyninge which they would not have byn done but in order to the workes on the south levell and beinge charged upon the Participants whole Adventurere land lyinge onely on the south they might have just cause of exception if the same bee employed to repaire high wayes and other thinges on the northside and not to such workes as may tend to the

completinge the whole worke, whereby to procure a finall adjudication, and for as much as the Companie conceive that the rivers in the south side beinge already for a great part imbanked and the reset sodainley to bee finished, there is a necessity to provide for leadinge away the downfall which would otherwise by [Page 263] reason of such imbankinge put the Country thereabouts in a worse condition then before, and enforce them to cut the bankes and the present setting upon those workes now in this dry season, and at the end of harvest when workemen are to bee had at a cheape rate will not onely ease the Companie in the charge but also give them the advantage of a winters experience thereby to amende any defects which may bee discovered, and the workes are of that nature as must bee done hereafter for the devision of the Adventure land from the Country and betweene the Adventurers themselves and may bee left of at any tyme though not fully finished without losse of the charge bestowed before, ad the charge proposed is so inconsiderable and the Companie, apprehendinge that the taxes in arrere already imposed beinge effectually levyed will together with their money in cash defray the charge of the workes in the north levell and also those on the south, doe therefore order that (notwithstandinge any former order) the said workes for the carryinge away the downfall on the said south levell bee speedily and effectually taken in hand and proceeded in but not thereby to interrupt or hinder the workes on the north side. And the agents for the Companie are not to engage to Companie in any workes on the south levell exeedinge £5000 includinge the £2500 formerly designed by the Companie for those workes

| 16/08/52 | 7 | The members of the comptroll, also takinge into consideration the order of refference touching a highway from Bevills Leame up to Ramsey, it is by them thought fitt not to give any order therein at present for the doinge of it. |
| 16/08/52 | 8 | The comptroll, also takinge into consideration the order or refference touching the stopps under March bridge and March towne in regard it was alledged by Sir Cornelius Vermuyden that it will bee very inconvenient for the Companie to take up March bridge which is mainteyned at the charge of the Country and the takinge up the gravells in March towne will bringe downe the water too fast into the lower levell, therefore they cannot advise the doinge thereof att this tyme. |
